Automatic Smart
Parking System using Internet of
Things (IOT) - Automatic train
operation (ATO) is an operational
safety enhancement device used
to help automate operations of
trains. Mainly, it is used on
automated guideway transits and
rapid transit systems which are
easier to ensure safety of humans.

Automatic train operation -
Wikipedia - A headlamp is a
lamp attached to the front of a
vehicle to light the road ahead.
While it is common for the term
headlight to be used
interchangeably in informal
discussion, headlamp is the term
for the device itself, while
headlight properly refers to the
beam of light produced and
distributed by the device.
