icdl module 5 notes pdf - The
Start menu is a user interface
element used in Microsoft
Windows since Windows 95 and
in some other operating
systems. It provides a central
launching point for computer
programs and performing other
tasks.

An (artificial) neural network is a
network of simple elements
called neurons, which receive
input, change their internal state
(activation) according to that
input, and produce output
depending on the input and
activation.
