The poster exhibition and the oral poster communication session are the mainstay of the annual European Association of Hospital Pharmacists (EAHP) Congress and only the best are selected! Sun, 24 Feb 2013 23:59:00 GMT Abstract | European Association of Hospital Pharmacists - Background Oral erythromycin prolongs cardiac repolarization and is associated with case reports of torsades de pointes. Because erythromycin is extensively metabolized by cytochrome P-450 3A (CYP3A) isozymes, commonly used medications that inhibit the effects of CYP3A may increase plasma erythromycin concentrations, thereby increasing the risk ...
