The Stubborn Fat Solution 3
Your Hormones and Stubborn Fat
Stubborn fat develops when your
hormonal pathways are broken
down. Age does play a role in
this: fat deposits increase and
become more resistant to fat loss
methods as you get older. This
you have little control over, but
some things that lead to stubborn
fat development are under your
control. Thu, 19 Apr 2018

Forums - to stubborn fat If
youâ€™re a woman, I apologise
for the following bad news.
Women have up to 5 times more
alpha receptors than men.
Therefore stubborn fat is not
entirely youâ€™re fault and it is
harder to get rid of. Stubborn
fat is more insulin sensitive than
other fat cells. A more insulin
sensitive fat cell stores more fat
and releases less of it.
